Every gifter knows that amazing feeling of picking out the perfect gift for friends and family - but what if there's a way to *double* that joy? Giving **eco-friendly gifts** is an option that will have you being kinder to the environment. Instead of giving something that will inevitably end up in the trash after a couple of months, opt for thoughtful sustainable goodies like a movie with our beloved Pope Francis given to you as a gift to pass it on for free, a Laudato Si' book, a sustainable water bottle ... and much more.
